Subject: availability for next week for San Mateo Basin Meeting

I would like to schedule a meeting for either Monday or Wednesday next week at EPA- I was thinking from 10 to 2:30 – with a break for lunch. Mark how does your schedule look? I was hoping you could be available for an hour or so to meet with Karen – who is working on the Ground water section of the HRS- let me know which day works for everyone and I will find a room and prepare an agenda.
